

USEFUL APPLICATIONS

The spectrum of voice processing applications is limited only by your imagination.

- ◆ SELL your products 24 hours a day.
- ◆ FAX-BACK

information to your potential customers any time, any place – IMMEDIATELY!

- ◆ Provide up-to-date and accurate information to MOVIE-GOERS and TELEVISION viewers.
- ◆ Set up your own DATING SERVICE.
- ◆ Streamline a job search with a voice activated EMPLOYMENT BULLETIN BOARD.
- ◆ Advertise and provide immediate FAXED-BACK literature for REAL ESTATE AGENCIES.
- ◆ Create your own ANSWERING SERVICE.

- ◆ Market your products with a TALKING CLASSIFIED service.
- ◆ Give your AIRLINE PASSENGERS accurate arrival and departure information
- ◆ INCREASE CAR SALES by providing perspective customers with a verbal snapshot of any vehicle before they even see the car.
- ◆ Enable your customers to use a TECHNICAL SUPPORT HOTLINE. Get them the information that they need without tying up your staff.

Voice Processing will streamline the operations of any business or service while helping to control costs. TTI can get you a system that you can afford and easily install.

Multi-Line Voice Mail Plus... FAX ON DEMAND!

V/S PLUS+

V/S PLUS+ is a high performance, low-cost, DOS-based, multiple-line Voice Mail & Call Processing system bundled with FAX-on-Demand software. V/S PLUS+ will save you time and make you money.

V/S PLUS+ includes Talking Technology's powerful multi-line call processing card, Voice Mail & Call Processing Software, FAX-on-Demand software, complete documentation, and a powerhouse full of utilities to get your application up and running – NOW!

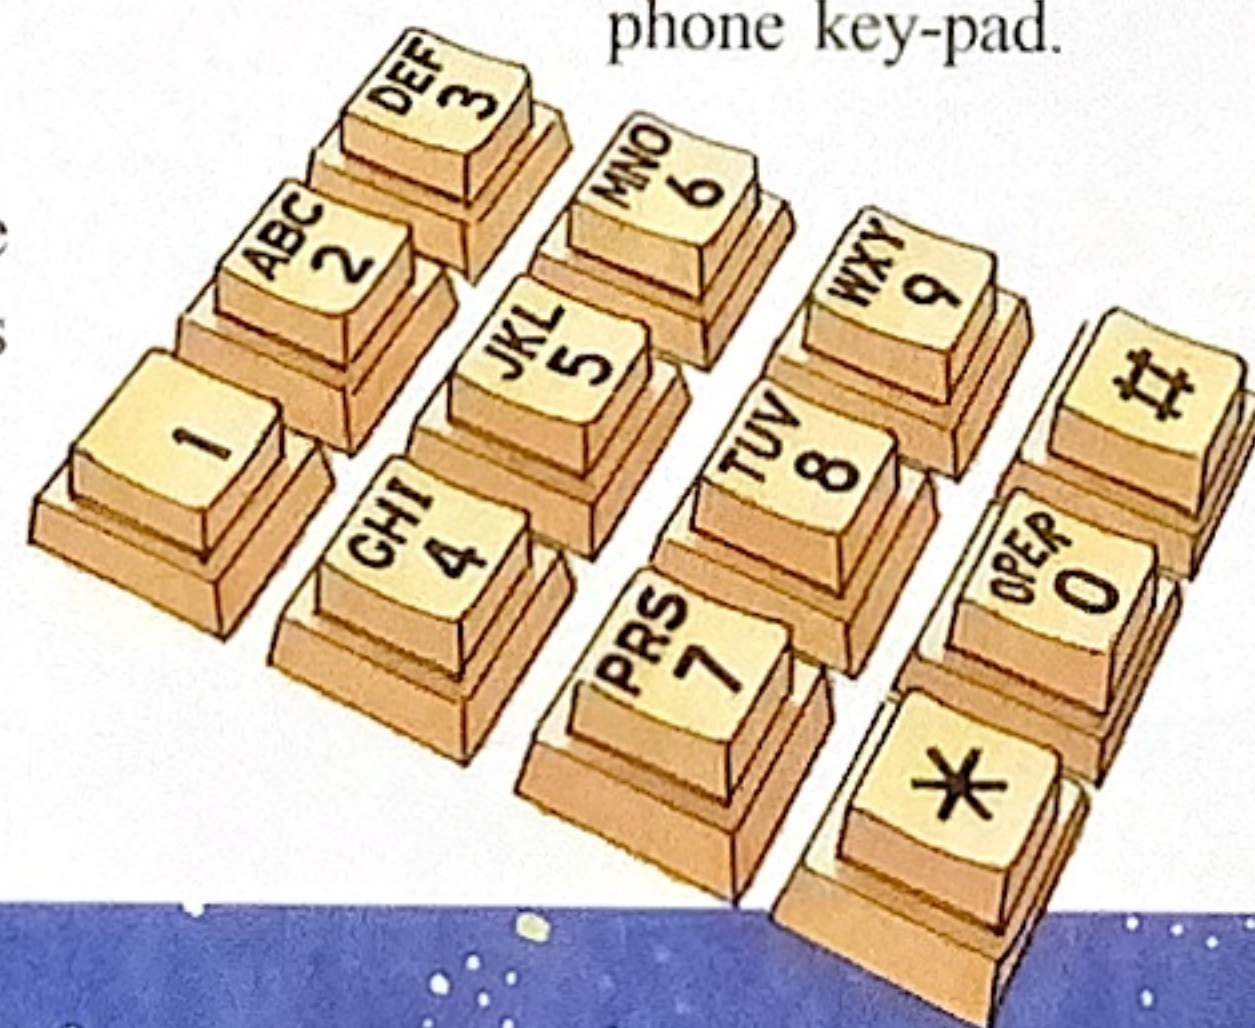

With V/S PLUS+ you can interface your existing PC (286/386/486 or PS/2 models 25 & 30) with your current telephone system (TELCO lines, Centrex, many PBXs and hybrid systems) to take advantage of V/S PLUS+ features which include:

◆ Answering, transmitting and processing of MULTIPLE LINES simultaneously.

◆ BACKGROUND operation which allows you to use your computer while V/S PLUS+ transparently handles your telephone communications.

◆ CALL SCREENING available to each user.

◆ FINGER-SPELL function lets callers reach their destination by simply spelling on the phone key-pad.

◆ Call LOGGING automatically keeps records for you.

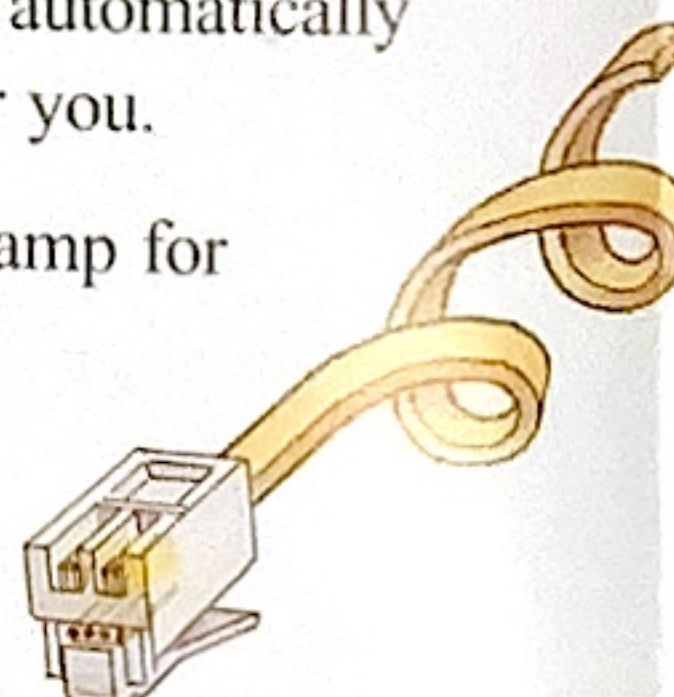

◆ Time and date stamp for all messages

◆ Password protection gives you the SECURITY that you need.

◆ Prompts and system greetings are easily CUSTOMIZED to your specifications.

◆ EASY setup and installation.

◆ INTERNATIONAL Versions Available.

FAX-ON-DEMAND

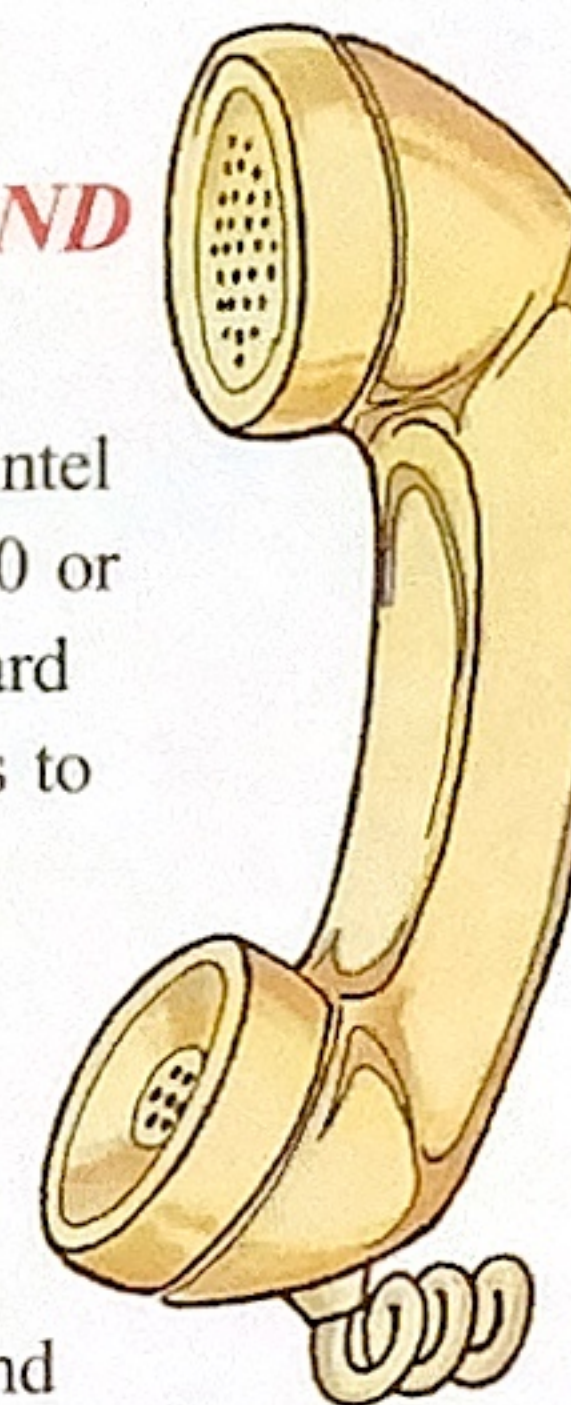

V/S PLUS+ in conjunction with the Intel SatisFAXtion 200, 300 or 400 or Intel Classic card instantly sends FAXes to potential customers, clients, or anyone needing hard copy. Just scan the documents into your V/S PLUS+ system and make them available to inbound callers 24 hours a day.

V/S PLUS+ supports ASCII, .PCX, and .DCX files. System owners can easily scan in any needed documents to their hard drive. Callers can then retrieve up to 20 documents FAXed-Back to their FAX machine at one time. Callers easily make their selection(s) by pushing buttons on their telephone key-pad.

After the caller selects requested documents, they key-in their FAX number (from their telephone or FAX machine) and hang-up. V/S PLUS+ will then FAX-Back any selected documents INSTANTLY to their FAX machine.

NEW BONUS! FAX-ON-DEMAND FEATURES

V/S PLUS+ now offers FAX-ON-CALLER'S DIME. When callers request FAX-back documents from their FAX machine, the

FAX transmission will be charged on the caller's phone bill – NOT YOUR BILL!

What Does This Mean?

If you are advertising products, and potential customers are calling into V/S PLUS+ to retrieve information, you won't go broke with HIGH phone bills. This feature is ideal for anyone who sells products over the telephone and FAXes information to potential customers.

V/S PLUS+ ACCESSORY SOFTWARE

TTI allows you to expand the capabilities of V/S PLUS+ with several exciting add-on packages.

CLASSIFIED INFORMATION PACKAGE

Allow your customers to receive information about your products without unnecessary menus. With the CLASSIFIED INFORMATION SYSTEM you can categorize

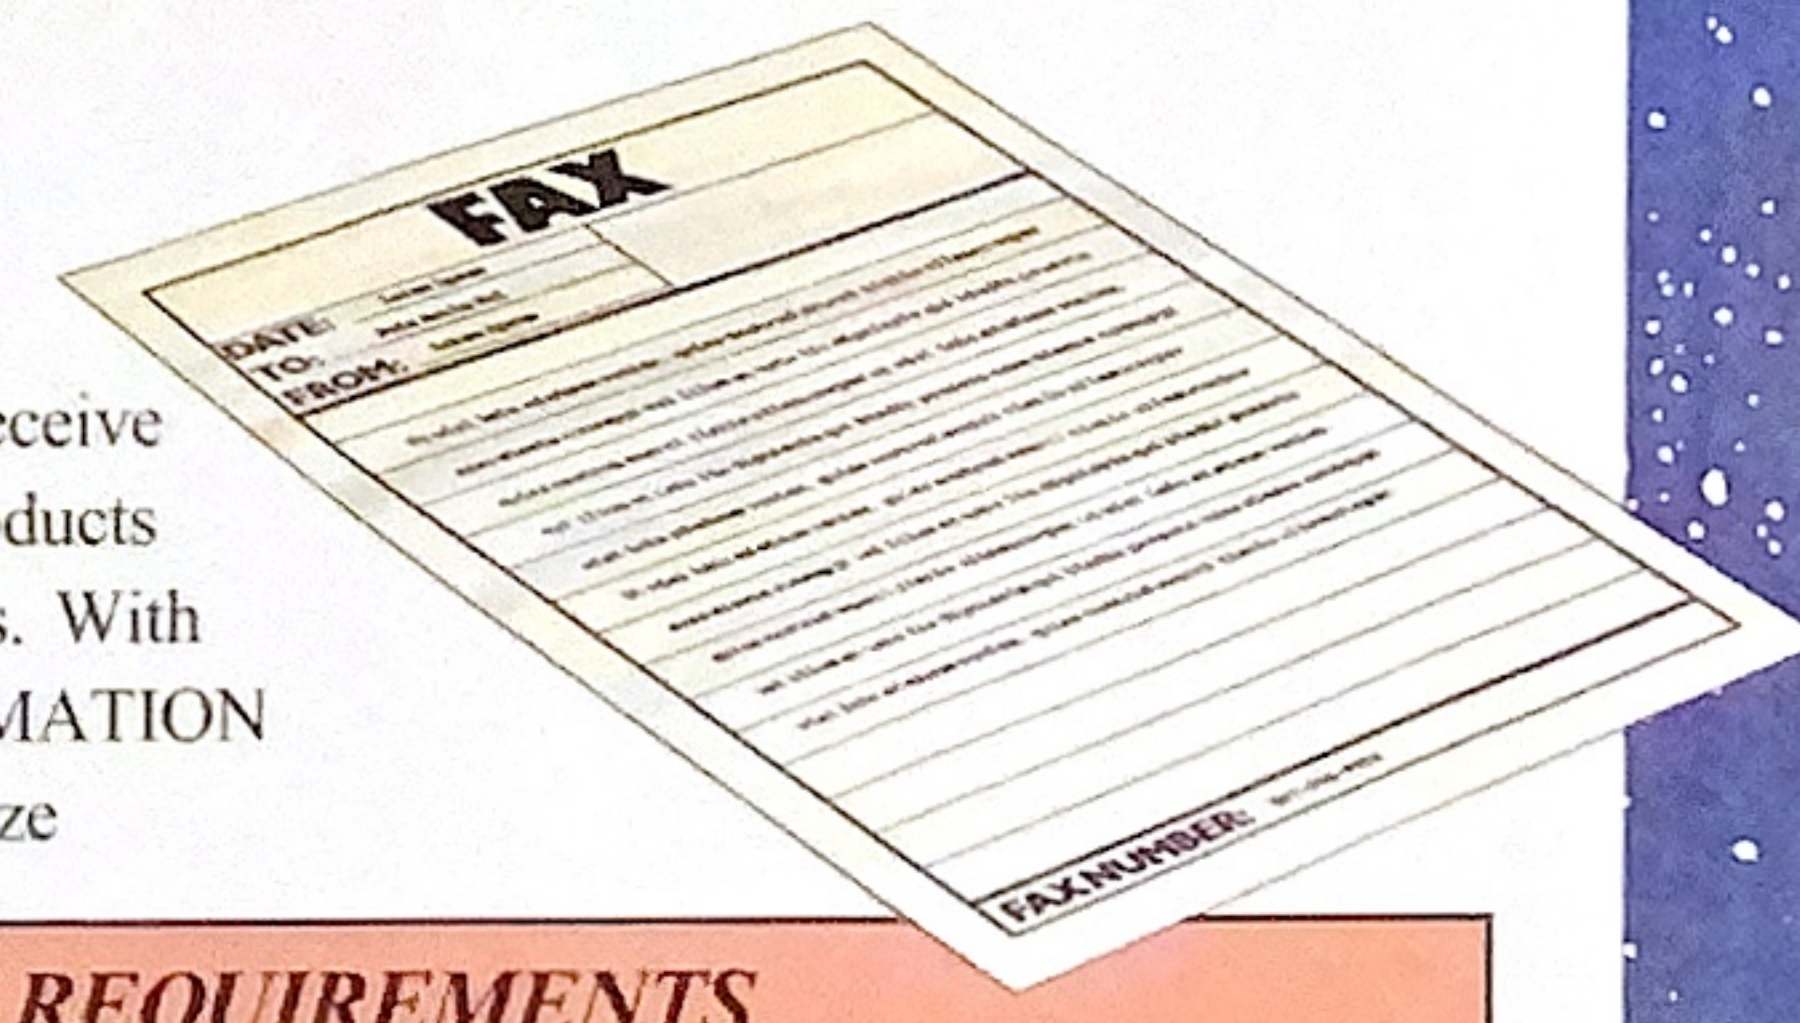

product/service information – making it easily accessible to inbound callers.

SUBSCRIPTION PACKAGE

The Subscription Package allows subscribers access to a hotline of specific products or services. A subscriber is given a private passcode when they purchase a product or service. Each passcode can have a preset limit as to the number of times the system may be accessed.

VOICE VIEW

VOICE VIEW is a utility that allows you to professionally edit your speech files.

SYSTEM REQUIREMENTS

Number of Lines	Computer Required	Hard Drive	Memory Usage
Two-line system	286/10 mhz	40 meg	127 Kbytes
Four-line system	386sx/16 mhz	60 meg	179 Kbytes
Six-line system	386/20 mhz	80 meg	247 Kbytes
Eight-line system	386/25 mhz	100 meg	315 Kbytes

STORAGE & MEMORY REQUIREMENTS

System owners must have at least 640 Kbytes of conventional memory to operate V/S PLUS+. Voice files take up approximately 2.5 minutes per megabyte on your hard drive. You can also save 16 Kbytes for each line if you use Expanded Memory. FAX documents with text will require approximately 5 Kbytes per page of disk storage space. Documents with graphics will need approximately 50 to 100 Kbytes per page.
